Personalized website developed using HTML5, Javascript, CSS, Bootstrap and JQuery.

Work Experience

Warehouse Associate

May 2016 - August 2019

Throughout my career with the company, I had a variety of positions, which included picking orders for both British Columbia and the US branches and later receiving products. I was proficient in operating the TELZON gun for inventory control as well as company specific software and familiar with modern warehousing practices and methods. I gained good organizational and time management skills.

Key Successes

- Picking Large Orders for BC and US branches with minimal to no errors, in a timely fashion
- Helped re-align BC orders to increase productivity
- Assisted in organising new sundry products for better efficiency
